SABIN SHARMA PAUDEL

Back End Developer / Artificial Intelligence Programmer

DETAILS

Contacts

Balaju, Kathmandu , Nepal
dcoster.sabin@gmail.com
9860691522

Nationality
Nepali

Date / Place of Birth
1998-05-02
Kathmandu

PROFILE

It all started with a hello world in Qbasic and the story continues. Deep learning and reinforcement learning has been my key interest despite software development. I love how i can make a system do what i want it to do.

EDUCATION

Bachelor's In Information Management , National College Of Computer Studies , Kathmandu
2016 - Ongoing

SKILLS

- TensorFlow
- Keras
- DeepLearning
- Python
- Django
- Java
- PHP
- Laravel
- Git
- HTML / CSS / JavaScript
- Linux
- Git
- MATLAB
- Arduino

COURSES

Machine Learning , Stanford Online
OCT 2020 - OCT 2020

Deep Learning Specialization , Deeplearning.ai
JULY 2020 - SEPTEMBER 2020

Introduction to TensorFlow for Artificial Intelligence , Machine Learning and Deep Learning , Deeplearning.ai
AUGUST 2020 - AUGUST 2020

Applied AI with DeepLearning , IBM
SEPTEMBER 2020 - OCTOBER 2020

Deep Learning , Kaggle
SEPTEMBER 2020 - SEPTEMBER 2020

Python Basic , Kaggle
SEPTEMBER 2020 - SEPTEMBER 2020

MATLAB Onramp , MathWorks | Training Services
OCTOBER 2020 - OCTOBER 2020

Deep Learning Onramp , MathWorks | Training Services
OCTOBER 2020 - OCTOBER 2020

Version Control with Git , Atlassian
OCTOBER 2020 - NOVEMBER 2020

Intro to Machine Learning , Kaggle
NOVEMBER 2020 - NOVEMBER 2020

Intermediate Machine Learning , Kaggle
NOVEMBER 2020 - NOVEMBER 2020

ACHIEVEMENTS

Best Position Top 4% Globally (Kaggle - Digit Recognizer)

OCTOBER 2020 - OCTOBER 2020

Developed model to classify hand written digits with 0.99664% prediction accuracy.

Best Position Top 12% Globally (Kaggle - Petals to the Metal: Flower Classification on TPU)

OCTOBER 2020 - OCTOBER 2020

Developed classification model to classify flowers petals to 104 different classes with 0.95509% prdiction accuracy

Runner Up - ICT 6.0 Smart City For Sustainable Development (WeCan)

DECEMBER 2019 - DECEMBER 2019

Developed a hardware solution for waste management called (WeCan) along with software implementation to keep track and record the amount of waste.

Second Runner Up - Nccs Workshop Python (News Portal)

AUGUST 2019 - AUGUST 2019

Developed a web portal which shows news from different sources according to the subscription made in different languages.

Winner - NCCS Hackathon 2020 (Automated Parking Solution)

FEBRUARY 2019 - FEBRUARY 2019

Developed Hardware and Software solution to manage empty places as parking.

Runner Up - Nccs Workshop JavaScript (Deal Mart)

FEBRUARY 2019 - FEBRUARY 2019

Developed an e-commerce site which has its own payment system.

RECENT PROJECTS

Neural Style Transfer

AUGUST 2020 - AUGUST 2020

Implementation of neural style transfer based on research paper Image Style Transfer Using Convolutional Neural Networks

Face Recognition Attendance System

DECEMBER 2020 - DECEMBER 2020

FacialRecogniation attendance system is a smart computer vision attendance system which requires images for training the model and can be tweaked according to our needs.

Pneumonia Prediction From X-ray

APRIL 2020 - APRIL 2020

A classification model that predicts existence of pneumonia in patients from given x-rays. Datasets are collected via Kaggle.

A3C

JULY 2020 - JULY 2020

Implementation of simple reinforcement learning algorithm (Asynchronous Actor-Critic Agents) using open ai gym library. As an environment it uses DOOM.

Self Driving Car (Reinforcement Learning)

MAY 2020 - MAY 2020

Reinforcement Learning agent for driving car without hitting the obstacle.

Space War Hand

OCTOBER 2020 - OCTOBER 2020

Play simple game with hand gesture trained with rock paper and scissor dataset.
